Interior Landscaping

June 2014

Happy Spring!

Green Buildings, eco-friendly design and sustainability are all “hot” topics for both you and your clients. We offer a compelling one-hour continuing education program on the health and well-being benefits of indoor plants, Living Walls and Green Roofs that speaks directly to the important issues relating to our region’s green design interests. The program offers 1.0 Health Safety and Welfare (HSW) hours of continuing education and 1.0 LEEDS credit.

We would love to bring this relevant information to you through the lunch-and-learn programs **Living Walls & Green Roofs** and **Living Walls** (see attached). As a local CEU registered provider, we look forward to setting up the best time and place to make this learning opportunity available to your firm.

In 2013, I was awarded the title of the most productive GPGB Registered Trainers reaching over 120 architects, engineers, landscape architects and interior designers. In November 2014, I will be presenting *Green Wall Case Studies: Comparisons, Advantages, and Challenges* at the annual American Society of Landscape Architects in Denver.

If you are interested in either of these CEUs, please complete the attached form and return it either via fax or e-mail.

Sincerely,

Kathryn O’Donnell

Green Plants for Green Buildings, Educational Campaign

www.greenplantsforgreenbuildings.org

AIA Provider No.: G447

AIA Program Name: PAW2 GPGB-LW

AIA/CES Registered Provider Program Summary

Provider Name: Green Plants for Green Buildings

Program Title: Living Walls & Green Roofs

Length: 60 minutes **Credits:** 1.0 (Learning Units) **HSW:** Yes (Yes or No)

Program Overview:

Participants will gain knowledge regarding the differences present in various Living Walls and vegetated roof systems and how those systems are appropriate for differing needs. Instruction will be given in best practice and use of Living Walls and vegetated roofs so that upon completion they will be able to offer the highest quality service available. Participants will also learn how biophilic design factors profoundly the well-being and overall profitability of the modern built environment.

Learning Objectives:

Participants will gain knowledge regarding the differences present in various green walls systems as well as vegetated roofs systems and how those systems are appropriate for differing needs. Participants will be given instruction in best practice and use of green walls and vegetated roofs so that upon completion they will be able to offer the highest quality service available. Participants will learn how biophilic design factors profoundly affect the well-being and overall profitability of the modern built environment.

- Evaluate and measure what our human behaviors and recent science demonstrate regarding the biophilic response to live plants.
- Comprehend and apply what these measurements mean for green building designs.
- Empower to initiate, plan and gain support for biophilic plant programs within the architectural and interior design processes.
- Comprehension of different types of systems and their uses within an environment.

How Taught:

The CES facilitator utilizes a PowerPoint presentation and a script, which gives an overview of the specific, measurable environmental contributions of living walls and green roofs. The facilitator will review general planning and cost issues of installing and maintaining these living walls and green (vegetated) roofs. The program will conclude with a questions and answer session.

Facilitator Qualifications (include name and qualifications for each):

All Green Plants for Green Buildings Facilitators have been trained on CES guidelines and presentation skills. In addition, they receive continuous in-depth training on every aspect of green design considerations as they relate to interior plant installations.

Method of Delivery:

Face-to-face lecture.

Audio/Visual required:

Screen for the PowerPoint, LCD Projector for PowerPoint.

Cost to participants:

There is no cost to bring this program into your firm or chapter meeting.
